

Who We Are

In 2008 Momentum Recycling was founded with the mission of **helping communities move towards zero waste**. While this may seem like a daunting goal, we believe that together, by taking small but important steps, we can make great progress.

Momentum Recycling is a full-service zero waste company offering comprehensive recycling collection services to organizations and residences along the Wasatch Front.

"Recycling is the easiest way to conserve our natural resources and protect the beautiful places we cherish. It also creates meaningful jobs and is great for the economy."

- John Lair, President & CEO
Momentum Recycling

Residential Services

Momentum Recycling's residential curbside program allows residents to conveniently recycle glass from their homes. Glass is picked up from participating homes monthly and processed at the Momentum Recycling Facility in Salt Lake City.

In addition to their curbside programs, Momentum Recycling collects glass from dozens of public glass drop-offs around the state. Since 2020, Momentum has worked with local artists to create murals on several public glass drop-off dumpsters.

Commercial Services

Momentum Recycling offers commercial glass recycling, food waste, and mixed recycling services to businesses spanning from Ogden, to Lehi, to Park City. Momentum Recycling services hundreds of businesses working to divert their waste from the landfill.

Momentum Recycling offers services for glass, mixed, and food waste recycling. Additionally, special services such as e-waste collection and waste audits are offered. Each month, commercial clients are provided with a diversion report which shows the measurable impact of the business.
